

The New Age of Premium Card Solutions

Business Shaped Solutions

It is challenging for card issuers to differentiate their offerings through rewards and rates. Increasingly, marketing now drives cardholder affinity and engagement, and ultimately wallet preference.

Novoflex provides a unique and powerful solution for issuers. By enabling custom EMV/smart chip shapes and designs, we enable issuers to market more effectively, stand out from the competition, and enhance card portfolio ROI.

About sAiL™

Novoflex's proprietary sAiL™ is an innovative single inlay solution for smart card applications including payments, telecommunications and IoT. It is patented in over 30 countries across the US, Europe and Asia, and complies with global smart card standards such as ISO/IEC 7816.
